

Latest Additions to this Course

Happy to inform you that the latest update of this Course is released on **16th May 2020**

Based upon Student Feedback and changing trends, we keep on updating our courses periodically. Here are some highlights of the latest updated.

- 5 Modules on Recursion instead of one with more questions and newly recorded videos.
- New Videos in Number Theory Section
- New Hint Videos for Graph Questions
- Addition of Strongly connected components in Graphs Section, Cycle detection using DSU.
- Generic Programming using STL Section in course
- Some students had asked for Huffman Encoder, I have added videos by our mentor in the Webinar Section section (It is optional to watch, the code is written in Java but you can understand and code in C++ as Assignment)

Regards
